

6.

```
SELECT First_name FROM EmployeeDetails WHERE First_name like '%s%' AND  
Yearly_Salary <= 50000000;
```

7.

Before applying for this Software Quality Assurance(Internship) role with your company, I spent time reading the job description and person specification. I wanted to make sure I was both properly qualified for the role. I am a very good communicator and find it's easy for me to relate to other people. I really enjoy learning new things and am constantly seeking out new learning opportunities. When solving problems, I apply both logic and emotional aspects in equal proportion. I am someone who is ambitious; I don't like to sit back and just do the bare minimum, and if you hire me, I will not only work hard to deliver consistent positive results, but I will also use my developing, researching, analytical and technical skills to help the company continually thrive and develop.
